

MED BEST PRACTICE QUIZ

How often do you verify if your patient has had a medication change?

Each visit with the patient

Once a quarter

Once a year

How do you add a new medication to your patient's Medication Best Practice?

Choose 1 on the medication drop down and then pick the new medication

Prefill the previous assessment, and then add another spot on the medication dropdown to add the new medication. Document the medication name and the patient's level of understanding of the use and proper technique of use.

You don't have to document any new medications.

Where do you find the side/toxic effects of the medications to teach your patients?

You don't teach patients about the side/toxic effects

Google it

The patient education book
